Diagnostic Wall Mounted System is a healthcare equipment setup that integrates diagnostic tools into a compact, wall-mounted unit, typically found in clinical or hospital settings. These systems streamline the patient examination process by keeping essential diagnostic instruments like otoscopes, ophthalmoscopes, blood pressure monitors, and thermometers organized and readily accessible. By mounting these tools on the wall, healthcare providers can efficiently conduct exams while maintaining a clean and organized workspace, which enhances infection control and minimizes equipment loss or damage. Wall-mounted diagnostic systems are designed for durability, easy sanitation, and to support clinical workflow and ergonomics in various healthcare environments.
