Diamond laser inscriptions are tiny marks or designs that are permanently etched onto the surface of a diamond using a laser beam. These inscriptions are usually placed on the girdle of the diamond, which is the thin outer edge that separates the crown from the pavilion of the stone. Diamond laser inscriptions are a valuable tool for ensuring the diamond's identity and can be an important aspect of the diamond's provenance and history. They are also a way for consumers to add a personal touch to their diamond purchases. Diamond laser inscriptions provide a valuable tool for identification, security, and personalization, enhancing both the practical and sentimental value of the diamond. Whether for professional or personal reasons, these inscriptions ensure that each diamond carries a unique and traceable mark.
