Dishwashing capsules and tablets for automatic dishwashers are pre-measured cleaning products designed specifically for use in dishwashing machines. These products combine detergents, rinse aids, and sometimes water softeners or enzymes into a compact, easy-to-use form. They are formulated to remove grease, food residues, and stains effectively, leaving dishes, glassware, and utensils clean and shiny. Capsules are typically encased in a dissolvable film, while tablets are compressed solid forms, both designed for convenience and efficiency.

Additionally, the trend toward environmentally friendly products has led manufacturers to develop biodegradable and eco-friendly dishwashing formulations, further boosting market growth.

Market Challenge
