Abstracts

According to our (Global Info Research) latest study, the global Display Panel Power Management Chip market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

The power management IC (PMIC) is often a vital part of the lower-voltage DC subsystem, as circuits have multiple power rails with tight individual specifications as well as mandated relationships among them.

The rapid development of the global display industry in 2021 has also driven the continuous increase in the procurement scale of panel driver chips and power management chips. In the future, with the continuous release of G10.5/11 high generation line production capacity in mainland China and the production of multiple new panel production lines such as Huaxing Optoelectronics T9, the demand for power management chips by local panel factories in mainland China will continue to grow. At the same time, affected by the tight supply of the Semiconductor industry chain, the continuous shortage of wafer capacity has led to the rising price of Foundry model, and the price of related chips will also remain high for a long time. Following a strong growth of 26.2 percent in the year 2021, WSTS revised it down to a single digit growth for the worldwide semiconductor market in 2022 with a total size of US\$580 billion, up 4.4 percent. WSTS lowered growth estimation as inflation rises and end markets seeing weaker demand, especially those exposed to consumer spending. While some major categories are still double-digit year-over-year growth in 2022, led by Analog with 20.8 percent, Sensors with 16.3 percent, and Logic with 14.5 percent growth. Memory declined with 12.6 percent year over year. In 2022, all geographical regions showed double-digit growth except Asia Pacific. The largest region, Asia Pacific, declined 2.0

percent. Sales in the Americas were US\$142.1 billion, up 17.0% year-on-year, sales in Europe were US\$53.8 billion, up 12.6% year-on-year, and sales in Japan were US\$48.1 billion, up 10.0% year-on-year. However, sales in the largest Asia-Pacific region were US\$336.2 billion, down 2.0% year-on-year.
