Disposable absorbable ligating clips are medical devices used in surgical procedures to securely close blood vessels or ducts. Made from biocompatible materials, these clips are designed to be absorbed by the body over time, eliminating the need for removal. They offer a safe and effective alternative to traditional sutures or permanent metal clips, reducing the risk of infection and promoting faster healing. Disposable absorbable ligating clips are widely used in minimally invasive surgeries, such as laparoscopic procedures, and are favored for their ease of use, biocompatibility, and post-surgical comfort for patients.
