Abstracts

According to our (Global Info Research) latest study, the global Disposable Catheter Stabilization Device market size was valued at US\$ 1407 million in 2023 and is forecast to a readjusted size of USD 2243 million by 2030 with a CAGR of 6.9% during review period.

A disposable catheter stabilization device is a medical tool designed to securely anchor catheters in place, minimizing movement and reducing the risk of catheter-related complications, such as infections or dislodgement. These devices are single-use, ensuring sterility and preventing cross-contamination. Typically, they consist of adhesive pads and locking mechanisms that provide stability without causing discomfort to the patient. They are widely used in healthcare settings, especially in intensive care, surgery, and long-term catheterization scenarios.

Market Driver

The disposable catheter stabilization device market is driven by the increasing prevalence of chronic conditions such as urinary incontinence, cardiovascular diseases, and cancer, which often require long-term catheterization. The growing number of surgeries and hospital admissions globally has also amplified the need for effective catheter stabilization to prevent complications such as dislodgment and infection. Additionally, advancements in device design that improve patient comfort and ease of application are propelling market growth.

Market Challenge

However, the market faces challenges such as the high cost of disposable catheter stabilization devices, which can limit their adoption in cost-sensitive regions. The availability of alternative stabilization methods, such as adhesive tapes and reusable devices, further impacts market penetration. Moreover, stringent regulatory

requirements for medical devices and concerns regarding medical waste disposal create additional barriers for manufacturers.

In terms of consumption, North America is currently the world's largest consumer market, accounting for 40% of the market share in 2023, followed by Europe and China, accounting for 28 % and 12% respectively. China is expected to grow fastest in the next few years, with a CAGR of approximately 9.84% during 2022-2028. From the perspective of manufacturers, the core manufacturers worldwide mainly include BD, 3M, B. Braun, ConvaTec and Baxter. In 2023, the market share of the top five companies in the world reached 55%.
