Disposable clip appliers and ligation clips are essential tools used in surgical procedures, designed to help surgeons quickly and effectively ligate and secure blood vessels or tissues. The design of the clip appliers allows for easy operation, enabling precise application of ligation clips to the target area, ensuring effective hemostasis. Ligation clips are typically made from biocompatible materials, providing sufficient strength and stability to prevent loosening or detachment during surgery. The disposable nature of these products reduces the risk of cross-contamination and simplifies the cleaning and disinfection processes after surgery.
