Dermal needle is a safe, effective and easy-to-use acupuncture treatment instrument with wide application value in clinical treatment of traditional Chinese medicine. Dermal needle consists of three parts: needle handle (rod), needle head and needle bundle. Needle handle has two specifications: hard handle and soft handle. The hard handle is made of hard plastic and has low elasticity; the soft handle is elastic and is generally made of ox horn. The needle tip should not be too sharp and should be pine needle-shaped. The whole bundle of needles should be flat to prevent deflection, hooking, rust and iron loss.
