According to our (Global Info Research) latest study, the global Drone Detection and Jamming System market size was valued at US\$ 435 million in 2023 and is forecast to a readjusted size of USD 617 million by 2030 with a CAGR of 5.2% during review period.

Unmanned aerial vehicles (UAVs) are among the notable growing technologies that have many beneficial applications, but they can also prove a significant threat. Drone Detection and Jamming System is designed to identify and mitigate threats posed by unauthorized or malicious drones (Unmanned Aerial Vehicles, UAVs) operating in sensitive or restricted airspace. These systems integrate various detection technologies and countermeasures, including radar, radio frequency (RF) sensors, electro-optical/infrared (EO/IR) sensors, and jamming technologies, to protect critical infrastructure, military facilities, airports, public events, and other high-security zones. Drone Detection and Jamming System, also known as counter-UAS or C-UAS, refers to systems that are used to detect and/or intercept unmanned aircraft systems while in flight. Counter-UAS technology is rapidly emerging and evolving as the mass adoption of drones takes place.
