Abstracts

According to our (Global Info Research) latest study, the global Eco-Friendly Barrier Coating Resins market size was valued at US\$ 1037 million in 2025 and is forecast to a readjusted size of US\$ 1567 million by 2032 with a CAGR of 6.1% during review period.

Global usage of eco-friendly barrier coating resins is projected to reach approximately 370,000 tons in 2025, with an average price of approximately USD 2,725 per ton and a gross profit margin of approximately 22%–29%. Eco-friendly barrier coating resins are typically water-based or high-solids systems, with the core consisting of film-forming resins (PVOH/EVOH, waterborne acrylics, waterborne polyurethanes, starch or other bio-based polymers), inorganic or organic barrier fillers (flaky kaolin, talc, nano-clay, SiO₂, etc.), crosslinking agents and additives (wetting agents, slip agents, defoamers, thickeners), and necessary heat-sealing or heat-resistant modifying components.

Typical performance parameters include: WVTR as low as 5–20 g/m²·day at 23 °C and 50%RH, OTR as low as 2–20 cm³/m²·day·bar (depending on formulation and substrate), coating basis weight generally 3–12 g/m² per side, suitable for substrates with basis weights of 180–400 g/m² paperboard or 40–120 g/m² paper; most systems can achieve heat-sealing temperatures of 140–220 °C. At 23 °C, under standard pulp repulping conditions, the peel rate or dispersibility meets the requirements of major paper group recycling lines. Typical usage: approximately 0.3–0.8 g of coating is applied to one side of a 250–350 mL paper cup; approximately 0.2–0.5 g is applied to a hamburger/sandwich packaging sleeve; 1 ton of coating can supply approximately 800,000–1,200,000 medium-sized cups or 400,000–600,000 takeout containers.

Upstream, the company primarily relies on aqueous polymer emulsions and PVOH/EVOH resins, bio-based starch and vegetable oil-modified polymers, inorganic functional fillers, and functional additives. Raw material and formulation costs account

for approximately 58%–70% of the coating's ex-factory cost. Downstream, the company focuses on paper cup paper, takeout box paper, food paperboard and flexible packaging conversion companies, as well as the designated packaging supply chain for large food and beverage brands.
