According to our (Global Info Research) latest study, the global Electronic Grade Epoxy Resin market size was valued at US\$ 2489 million in 2024 and is forecast to a readjusted size of USD 3429 million by 2031 with a CAGR of 4.7% during review period.

Electronic Grade Epoxy Resin refers to high-purity epoxy resins specifically formulated for use in electronic applications.

The rapid development of the electronics and electrical industries is driving the demand for electronic-grade epoxy resin, a crucial base material for copper-clad laminates. The increasing adoption of advanced consumer electronics, high-performance computing devices, and 5G telecommunications infrastructure necessitates higher-quality epoxy resins with enhanced properties, ensuring steady market growth.

Supportive policies promoting industrial upgrades and the localization of materials in countries like China are accelerating the development of high-end epoxy resin. Companies such as Shandong Shengquan Group and Guangdong Tongyu New Material are actively expanding their product portfolios and production capacity, capitalizing on these trends to fill gaps in high-end markets and reduce reliance on international suppliers.

Downstream customers in the electronics sector are increasingly prioritizing cost efficiency and stable supply chains, creating opportunities for domestic suppliers to compete with global giants. As environmental regulations tighten, companies with advanced technological capabilities and eco-friendly production qualifications hold a significant advantage, aligning with the market's evolving demands and ensuring long-

term growth.
