## Abstracts

Silica Gel Desiccant: Has great deal of internal surface area, appearance is generally spherical. It is a tasteless, odorless, non-toxic, non-corrosive, and chemically inert substance. An aqueous solution of sodium silicate is acidified to produce a gelatinous precipitate that is washed and then dehydrated to produce Silica Gel Desiccant. It is a highly activated desiccant that is available in numerous mesh sizes designed for many uses in industry. During adsorption, there is no chemical reaction in the Silica Gel Desiccant, and no byproducts are created. It is non-deliquescent, and its shape and size never change. Its outer surfaces stay dry and it remains free-flowing, even when it is saturated with water.
