Abstracts

'Sodium Cyanide is an inorganic compound with the formula NaCN. Sodium cyanide, a white, water-soluble solid, is a kind of important basic chemical raw materials. Cyanide has a high affinity for metals, which leads to the high toxicity of this salt. Sodium cyanide's main application is in gold mining, chemical intermediate. Also exploits its high reactivity toward other metals. When it is treated with acid, it forms the toxic gas hydrogen cyanide.

In this report, we statistics the solid product of sodium cyanide, and the liquid product is converted into the solid product (100% sodium cyanide). For example, 10 MT of 30% liquid product is converted into the 3.33 MT of solid product (100% sodium cyanide).'
