Endotoxin and Pyrogen Test Service is a service that evaluates whether drugs, medical devices, cosmetics, foods and biological products contain endotoxins or pyrogens through a series of specialized laboratory test methods. Endotoxins usually refer to lipopolysaccharides released by Gram-negative bacteria, and pyrogens are any substances that cause an increase in body temperature, including substances produced by bacteria, viruses or other microorganisms. This service ensures product safety through sensitive testing technologies such as Limulus Amebocyte Lysate (LAL) reagent method and rabbit temperature reaction method to prevent adverse reactions such as severe immune reactions or fever caused by endotoxins or pyrogens.
