Abstracts

Accelerated Solvent Extraction (ASE) is a fully automated technique that uses common solvents to rapidly extract solid and semisolid samples. ASE operates at temperatures above the normal boiling point of most solvents, using pressure to keep the solvents in liquid form during the extraction process. Typically, ASE methods are completed in 15–25 min, while consuming only 15–50 mL of solvent. ASE was introduced in 1995 by Dionex Corporation and is recommended under US EPA Methods 3545 and 3545A for extraction of organ phosphorus pesticides.
