Abstracts

Mattress Topper is literally a thinner version of a traditional full mattress. They are lesser in height but often made of the same types of material as found in a thicker full size such as a latex or foam based model. They are most commonly one consistent layer between 1" and 5" thick which you place directly ontop of your existing surface, and then place your bedding over this new top layer.

The mattress topper is generally a more expensive, thicker and more comfortable version of the typical mattress pad.
