Abstracts

Track and trace solutions are not just economic measures for supply-chain efficiency. Experts estimate that 5% of all drugs sold worldwide are counterfeits – in some countries, figures even reach a shocking 50 %. Billions of products are “lost in the supply chain” every year. Counterfeit drugs and product diversion risk lives, undermine revenues, and threaten company reputations. The pharmaceutical industry needs to ensure supply-chain security and gain the ability to authenticate the ePedigree, or life history, of a product.
