Abstracts

According to our (Global Info Research) latest study, the global EVA Foam Molding Machine market size was valued at US\$ 442 million in 2025 and is forecast to a readjusted size of US\$ 712 million by 2032 with a CAGR of 7.1% during review period.

In 2025, global EVA Foam Molding Machine production reached approximately 10,729 Units. The average price is approximately \$40,000. An EVA Foam Molding Machine is an industrial manufacturing machine used to process EVA (Ethylene-Vinyl Acetate) material into lightweight, flexible, and resilient foam products through controlled heating, foaming, and molding operations. The machine enables EVA to expand and solidify inside a mold, forming parts with specific density, cushioning, elasticity, and shape stability.

Gross Profit Margin Levels

From the perspective of the equipment manufacturing industry, the gross profit margin of EVA foam molding machines typically exhibits a tiered structure: 'standard models Industry Driving Factors

The core demand for EVA foam molding machines stems from the long-term upgrades in 'lightweighting + shock absorption and rebound + composite appearance' by the footwear and sports protection industries. On the one hand, the footwear injection molding equipment market itself maintains steady expansion (publicly projected to continue growing until 2031), providing a stable foundation for EVA machine upgrades and capacity expansion. On the other hand, the related sub-markets of EVA foam materials are also showing faster growth expectations, driving equipment iteration in the

sole/midsole segment for 'higher foaming consistency, lower energy consumption, and shorter mold changeover time.' Simultaneously, the preference of shoe manufacturers for high-speed and large-scale production has led to the continued penetration of the 'multi-station turntable + automation' injection molding model; at the same time, the increasing pressure of carbon and chemical compliance for export and brand audits has also prompted some manufacturers to emphasize 'low-carbon/cleaner foaming and manufacturing solutions'.
