Extended Length Low Retention Pipette Tips are specialized laboratory tools designed to enhance the precision and efficiency of liquid handling tasks. These pipette tips are longer than standard tips, allowing for easier access to deep vessels or containers. The low retention feature ensures minimal residual liquid remains inside the tip, which is achieved through a hydrophobic surface treatment that significantly reduces sample loss and contamination. This makes them ideal for applications requiring high accuracy and reproducibility, such as molecular biology, biochemistry, and pharmaceutical research. The combination of extended length and low retention properties provides scientists with reliable and consistent performance in their experimental workflows.
