According to our (Global Info Research) latest study, the global Fiber Gyro Coils market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Fiber gyro coils are intended for high-performance fiber gyros. They can be made with different fibers, dimensions, and winding patterns to suit specific applications.

Fiber gyro coils are essential components used in fiber optic gyroscopes. Fiber optic gyroscopes are inertial measurement devices based on optical principles, used to measure angular velocity and orientation. Fiber gyro coils are integral to these gyroscopes, utilizing the transmission of laser beams through optical fibers and measuring their rotation to achieve angular velocity measurement. These coils offer high precision, stability, and resistance to interference, finding wide application in aerospace, navigation, geological exploration, and other fields, providing critical support for precision measurement and positioning.
