Abstracts

According to our (Global Info Research) latest study, the global Fiber Optic Splice Closures (FOSC) market size was valued at US\$ 863 million in 2024 and is forecast to a readjusted size of USD 1145 million by 2031 with a CAGR of 4.2% during review period.

Fiber optic cables can be run underground, over aerial wires, and even beneath the oceans. They are exposed to some of the harshest environments such as rocky, dry, wet, snowy, dusty, cold, and hot. A splice closure is a small box made up of hardy plastic and covers the sensitive parts of the cable, protecting it from the external elements. Fiber optic splice closures play a crucial role in the strength of the fiber-optic network. Fiber optic splice enclosures are used to protect stripped fiber optic cable and fiber optic splices from the environment, and they are available for indoor as well as outdoor mounting. Outdoor fiber optic enclosures are usually weatherproof with watertight seals.

Global key players of Fiber Optic Splice Closures (FOSC) include CommScope, ZTT Group, Fiberhome Telecommunication, Zhejiang Chaoqian, etc. The top four players hold a share over 19%. Asia-Pacific is the largest market, with a share about 69%, followed by Europe and North America, with share 10% and 7%, separately. In terms of product type, Horizontal Type is the largest segment, occupied for a share of 55%. In terms of application, Underground has a share about 80 percent.
