Fireless aromatherapy is a practical way to add scent to a room. Fireless aromatherapy is a popular segment of the home fragrance market these days. They are very easy to use - insert the diffuser reed into a ceramic or glass container filled with fragrant oil; the reeds absorb the fragrant oil and emit a pleasant aroma in the air. Fireless aromatherapy provides a more stable scent than scented candles. Unlike candles, fireless aromatherapy is flameless and does not require any heat. It is a safe alternative to scented candles without the need to clean up soot, wax or ash. Reeds have structures that provide a controlled rate of fragrance release.
