According to our (Global Info Research) latest study, the global Fish Vaccine market size was valued at US\$ 415 million in 2024 and is forecast to a readjusted size of USD 753 million by 2031 with a CAGR of 9.0% during review period.

Fish vaccine are vaccine specially used on fish. The culture environment, be it in tanks, cages or ponds, seawater or freshwater, can stress the fish due to high stocking densities, reduced oxygen levels, sub-optimal water quality and high pathogen loads. Therefore, farmed fish, similar to farmed animals, have an increased susceptibility to infectious diseases. Such diseases may be bacterial, viral, fungal or parasitic in origin. These are the immune foundations for immunizing fish against various diseases.

The industry's leading producers are Zoetis and Merck & Co., Inc., which accounted for 52.92% and 34.85% of revenue in 2019, respectively.
