According to our (Global Info Research) latest study, the global Floor Heating Reflective Film market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Reflective film is the main material for improving the energy saving of floor heating. It is mainly placed between the thermal insulation board and the heating body (hot water pipes, heating cables) as a heat reflection material. A good reflective film can reflect the heat radiated by the heating body to the upper layer, effectively reduce the amount of heat lost downward, increase the heating rate, and achieve 10%-20% energy saving effect, which is of great significance to improving the energy saving efficiency of floor heating.
