## Abstracts

According to our (Global Info Research) latest study, the global Flyaway Satellite Terminal market size was valued at US\$ 1382 million in 2025 and is forecast to a readjusted size of US\$ 3068 million by 2032 with a CAGR of 12.2% during review period.

The flyaway satellite terminal is a small mobile communication system that integrates satellite communication equipment. It can be quickly deployed in any environment to provide users with instant satellite communication services. It is small in size, light in weight, and easy to carry. Users can operate it anytime and anywhere without being restricted by geographical location. Its advantage is that even in remote areas or when natural disasters cause the interruption of conventional communication networks, the portable satellite station can still ensure the stability and reliability of communication, provide effective communication support for rescue operations, remote expeditions, and outdoor operations, and ensure real-time transmission of information and timely response to emergencies.
