According to our (Global Info Research) latest study, the global Foldable Walking Stick market size was valued at US\$ 690 million in 2024 and is forecast to a readjusted size of USD 877 million by 2031 with a CAGR of 3.5% during review period.

Walking sticks are the hands that accompany people to walk and start to use. It is a must-have for many elderly people to 'walk' when they go out in their later years. It can not only stabilize your steps, but also enhance your physical strength. The foldable cane greatly solves the problem of inconvenient storage and carrying of the cane.

One of the advantages of folding canes is portability. Since it can be folded to a smaller length, the folding cane can be easily placed in a backpack or hung on a belt when not in use without taking up too much space. This is a clear advantage for outdoor enthusiasts who need to store and carry their canes frequently. Folding canes also tend to be lighter for hikers who care about carrying more weight. Folding canes are generally simpler to use and do not require complicated adjustments. Just unfold the folding stick, and you can use it directly, without worrying about the stick getting stuck or loosening due to the telescopic mechanism. This may be a more convenient and easy-to-use choice for beginners or those who are not used to adjusting the length of telescopic trekking poles. The canes and crutches market size was valued at USD 873.29 million in 2020 and is expected to reach USD 1.15 billion by 2028, at a CAGR of 3.59% from 2021 to 2028.
