Chondroitin Sulfate is a Sulfated glycosaminoglycan (GAG) composed of a chain of alternating sugars (N-acetylgalactosamine and glucuronic acid). It is usually found attached to proteins as part of a proteoglycan. A chondroitin chain can have over 100 individual sugars, each of which can be Sulfated in variable positions and quantities. Chondroitin Sulfate is an important structural component of cartilage and provides much of its resistance to compression. Along with glucosamine, chondroitin Sulfate has become a widely used dietary supplement for treatment of osteoarthritis.

The globe's rising and aging population needs additional healthcare and a nutritionally balanced intake. Manufacturers are helping to discover answers to some of the most pressing issues. They improve people's lives by avoiding, mitigating, and treating illnesses, as well as assisting in the provision of a consistent supply of high-quality meals and plant-based raw materials. Health and wellness products are those that provide a wide spectrum of the food and beverage business, as well as the beauty and cosmetics industry, on a worldwide platform. Younger customers in emerging regions are willing to pay a premium for health and wellness products as physical fitness is becoming more crucial. As people's health awareness grows, producers are revamping health and wellness products to reduce cholesterol, sugar, sodium content, and saturated fat. Health and wellness products provide buyers with health benefits as well as developments in diverse health and wellness products.
