Food-grade low molecular weight polyisobutylene (PIB) is a versatile, non-toxic polymer widely used in food-related applications due to its excellent safety profile and functional properties. With a lower molecular weight, this PIB variant exhibits high flexibility, tackiness, and viscosity, making it ideal as an ingredient in chewing gum bases, food-grade adhesives, and packaging materials. It is compliant with stringent food safety regulations, ensuring suitability for direct or indirect contact with food. Additionally, its resistance to moisture, oxidation, and chemical degradation enhances product stability, extending shelf life and maintaining quality in various food processing and packaging applications.
