Food-grade medium molecular weight polyisobutylene (PIB) is a safe and versatile polymer used in food-related applications due to its balance of viscosity, elasticity, and chemical stability. This medium molecular weight variant provides enhanced performance in applications requiring both flexibility and durability, such as chewing gum bases, food-safe adhesives, and sealants for packaging. Compliant with food safety standards, it ensures non-toxicity and suitability for contact with food products. Its excellent resistance to moisture, air, and chemical exposure helps maintain the integrity of food packaging and extends the shelf life of consumables, making it a reliable choice for the food and beverage industry.
