Framed and frameless glass railing systems are visibly different in terms of appearance and they utilize different assembly processes. As the name implies, framed systems utilize a post on the sides, and rails on top and bottom of the glass panel to frame it. Frameless systems, on the other hand, only utilize posts between each glass panel.

Seamless Glass Railing gives modern sophisticated look with customizable finishes. As its name suggests, a frameless glass balustrade forgoes any kind of structural frame. The glass panels in this style are usually connected to the substrate using a spigot system, but other materials such as standoffs and channels are also used. With no structural frame impeding view, everyone can enjoy a breathtaking view of the yard from balcony. The visual effect is why this style is a popular choice; it offers a minimalist and high-end appeal without the intrusion of a structural frame.
