According to our (Global Info Research) latest study, the global Fully Auto Biochemistry Analyzer market size was valued at US\$ 3547 million in 2024 and is forecast to a readjusted size of USD 4278 million by 2031 with a CAGR of 2.7% during review period.

Fully Auto Biochemistry Analyzer is a high-performance micro-controller based Photometric biochemistry analyzer used to measure various blood biochemical parameters such as blood glucose, urea, protein, and bilirubin etc. that are associated with various disorders such as diabetes, kidney diseases, liver malfunctions and other metabolic derangements. The quantization of these parameters is helpful in diagnosing health disorder. In the proposed project work, it is planned to automate the filter selection, sample aspiration, auto-calibration and other related parameters to be controlled through micro-controller-based hardware and software system. It is proposed to automate the sample handling system to cope up with the large no. of blood sample at a time.

The increasing demand for automation in laboratory processes was a significant driver. Auto biochemistry analyzers offer high levels of automation, reducing manual handling of samples and improving efficiency in laboratories.

The global rise in chronic diseases, such as diabetes, cardiovascular diseases, and liver disorders, increased the demand for diagnostic testing. Auto biochemistry analyzers play a crucial role in diagnosing and monitoring these conditions.

Emerging economies are investing in healthcare infrastructure development to address the growing healthcare needs of their populations. This includes the establishment of

new hospitals, clinics, and diagnostic laboratories, creating a demand for advanced diagnostic equipment such as Fully Automatic Biochemical Analyzers.

Continuous advancements in technology, including improved detection methods and data analysis capabilities, drove the development of more sophisticated auto biochemistry analyzers. This, in turn, enhanced the accuracy and reliability of test results.
