## Abstracts

According to our (Global Info Research) latest study, the global Glass Biaxial Fabric market size was valued at US\$ 776 million in 2024 and is forecast to a readjusted size of USD 1249 million by 2031 with a CAGR of 7.9% during review period.

Glass fiber biaxial fabric is a composite fabric made of glass fiber with a biaxial fiber arrangement structure. It is made of two groups of glass fiber yarns interwoven, one group of yarns is arranged along the longitudinal direction (machine direction) of the fabric, and the other group of yarns is arranged along the transverse direction (warp direction). The biaxial structure of this fabric gives it high tensile strength and excellent mechanical properties in both directions.
