Glass-lined mixing system is a kind of equipment used in chemical, pharmaceutical and food industries, mainly composed of glass-lined container, stirring device and heating/cooling system. Glass-lined as lining material has good corrosion resistance, high temperature resistance and chemical stability, making the system very reliable when handling corrosive and perishable materials. Glass-lined mixing system is usually used in mixing, reaction, stirring and heating processes to ensure that materials are chemically reacted or physically treated in a safe and stable environment. It is widely used in the reaction and mixing, dissolution and stirring of acid and alkali materials.
