According to our (Global Info Research) latest study, the global 0.6~72 KV Instrument Transformers market size was valued at US\$ 2273 million in 2024 and is forecast to a readjusted size of USD 2833 million by 2031 with a CAGR of 3.2% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

An instrument transformer is used to obtain measurements of voltage or current levels or both in different high-voltage/high-current systems such as in transmission or distribution lines or industries. An instrument transformer converts current or voltage from a high level to a very low level before passing it to measuring instruments, effectively isolating the measurement devices from the high voltage or current on the line. This report focuses on 0.6~72KV Instrument Transformers market.

The global electricity demand is rising, driven by population growth, urbanization, and industrialization. As a result, Instrument Transformer equipment plays a critical role in meeting this escalating demand and ensuring a consistent electricity supply. The government of countries such as Germany, the UK, the Netherlands, China, and more is focused on developing offshore wind power generation systems, which are expected to generate demand for advanced T&D equipment. Their inclination toward adopting clean energy to cater to the rising electricity demand from the industrial and residential sectors is to impact the global market growth positively. For instance, in May 2022, the launch of Interconnection Innovation e-Xchange (i2X) by the Biden Administration, through the U.S. Department of Energy (DOE), brought together the grid utilities,

operators, tribal and state government, energy justice organizations, and other stakeholders to solve America's power grid challenges and drive more clean energy to the power industry which is expected to drive the growth of the market.
