The global 1-Ethoxy-2-Propanol market size is expected to reach \$ 59.53 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032). 1-Ethoxy-2-propanol is a niche propylene glycol ether solvent and represents the mainstream commercial form in the Ethoxy Propanol market. It is also commonly referred to as propylene glycol monoethyl ether. The product offers good solvency, moderate evaporation characteristics, and favorable compatibility in both aqueous and organic systems, and is primarily used as a solvent or co-solvent in coatings, inks, adhesives, industrial cleaners, and selected electronic chemical formulations. Its upstream raw materials mainly include propylene oxide, ethanol, catalysts, and utilities, while its downstream customers are mainly coatings and ink manufacturers, industrial and precision cleaner producers, adhesive and specialty chemical formulators, as well as some electronic chemical companies. Based on the currently verifiable global supply landscape and the niche positioning of this product within the glycol ether family, global nominal capacity for 1-Ethoxy-2-propanol in 2025 is estimated at about 30,000 tons, with global sales of about 20,300 tons, an average ex-works price of around USD 2,050 per ton, and an industry gross margin in the range of 13%-20%. Overall, it is not a bulk commodity solvent, but rather a relatively concentrated and application-specific solvent segment with pricing above conventional basic glycol ethers.
