According to our (Global Info Research) latest study, the global 1-decene market size was valued at USD 840.7 million in 2022 and is forecast to a readjusted size of USD 1340.3 million by 2029 with a CAGR of 6.9% during review period.

1-decene, also known as decene-1, is an organic compound belonging to the class of alkenes. It is an unsaturated hydrocarbon with a chain of ten carbon atoms and a double bond located at the first carbon-carbon position (hence the name '1-decene'). The molecular formula of 1-decene is C₁₀H₂₀.

1-decene is a clear, colorless liquid with a mild odor. It is a member of the larger group of decenes, which includes other isomeric forms of alkenes with ten carbon atoms in the chain and a double bond at various positions.

As mentioned earlier, 1-decene finds numerous applications in the petrochemical and chemical industries, where it serves as a valuable building block for the production of various products such as Polyalphaolefins (PAOs), surfactants, lubricants, synthetic oils, plastics, and more. Its versatility and reactivity make it an essential component in the synthesis of various chemicals and materials.

In the global market, the core manufacturers of 1-decene are Shell Chemicals, Ineos, Chevron Phillips Chemical, ect. The top four players in the industry account for about 60% of the market share. North America, Europe, and China are the major production regions for this product, with North America accounting for over 40% of the global market share. The product can be classified on the basis of production process into Ethylene Oligomerization decene and wax cracking decene. It is widely used in polyalphaolefins, polyethylene copolymer monomers, detergents and plasticiser

alcohols, and other industries.
