SCOPE OF THE REPORT:

In consumption market, the growth rate of global consumption is drastic fluctuation. China is still the mainly consumption regions due to the cheap and rich raw materials and labor cost. meanwhile, the demand in China is mainly concentrated in the field of Cephalosporins.

It is mainly used in cefepime. The downstream market has been hit hard by restrictions on raw materials and China's antibiotic control policy. At the same time, with the launch of new cephalosporins. The outlook is very pessimistic, but due to the huge demand market in China, downstream products are unlikely to delist in a short period of time, and we expect to maintain a slow trend of slowing demand.

As BMS stopped production due to raw material factors, this is an opportunity for generic companies, but because BMS has only 16% market share in China, the growth point is not strong.

At the same time, with the new generation of cephalosporins, its living space is greatly suppressed.

The worldwide market for 1-Methylpyrrolidine (CAS 120-94-5) is expected to grow at a CAGR of roughly 1.8% over the next five years, will reach 3 million US\$ in 2024, from 3 million US\$ in 2019, according to a new GIR (Global Info Research) study.
