1-Octanol (synonym name: Caprylic Alcohol) is the organic compound with the molecular formula $\text{CH}_3(\text{CH}_2)_7\text{OH}$. It is a fatty alcohol. Many other isomers are also known generically as octanols.

1-Octanol is a liquid with colorless (to pale yellow liquid), fresh and orange-rose odor.

1-Octanol belongs to the group of primary aliphatic alcohols within a carbon chain length range of C 6-24. It is a fatty alcohol.

Scope of the Report:

This report focuses on the 1-Octanol in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

1-Octanol production is mainly concentrated in South Asia, EU and USA at present, the output of the three regions occupies about 79.23% of global 1-octanol production. The main market players are Kao Chem, Ecogreen Oleo, PTTGC, Musim Mas, Sasol, Basf and KLK Oleo, etc

Compared with a million-ton-production market size of isobutyl alcohol, 1-octanol is just a small market because the downstream application of 1-octanol is much smaller than the isobutyl alcohol. 1-octanol can be classified into two types: industrial grade and food grade, survey results showed that 80.29% of the 1-octanol market is industrial grade in 2015. With the development of economy, these industries will need more 1-octanol. So, 1-octanol has a huge market potential in the future.

China is now one of the major consumption regions in 1-octanol market, but it mainly depends on import from South Asia in fact. The price of the 1-octanol in China has increased a lot in the past years.

The worldwide market for 1-Octanol is expected to grow at a CAGR of roughly 4.7% over the next five years, will reach 290 million US\$ in 2023, from 220 million US\$ in 2017, according to a new GIR (Global Info Research) study.
