## Abstracts

According to our (Global Info Research) latest study, the global 1064nm Infrared Laser Modules market size was valued at US\$ 1369 million in 2025 and is forecast to a readjusted size of US\$ 2442 million by 2032 with a CAGR of 8.6% during review period.

In 2025, global 1064nm Infrared Laser Module output reached about 19 million units and global capacity of around 23 million units. The average price is about USD 70 per unit, with gross margins near 42%. 1064nm Infrared Laser Modules are semiconductor- or solid-state-based laser systems that emit near-infrared light at a wavelength of 1064 nanometers, commonly generated using Nd:YAG, fiber laser, diode-pumped solid-state (DPSS), or ytterbium-based laser technologies. These modules are widely used in industrial processing, LiDAR, medical aesthetics, military rangefinding, spectroscopy, optical sensing, semiconductor manufacturing, and scientific instrumentation because 1064nm lasers provide high beam quality, deep material penetration, strong pulse energy, and excellent compatibility with fiber-optic and nonlinear optical systems. The supply chain begins upstream with raw materials and core optical components including laser crystals (Nd:YAG, Yb:YAG), laser diodes, optical fibers, nonlinear crystals, precision optics, mirrors, lenses, photonic chips, semiconductor wafers, cooling systems, and electronic driver ICs supplied by specialty material and photonics companies. Midstream manufacturers integrate these components into complete 1064nm infrared laser modules through optical alignment, packaging, thermal management, wavelength stabilization, pulse-control engineering, and reliability testing. Downstream applications include laser marking and cutting equipment, autonomous vehicle LiDAR systems, cosmetic and dermatology devices, military targeting systems, optical communication instruments, biomedical imaging systems, and advanced research laboratories across industrial, automotive, aerospace, defense, healthcare,

semiconductor, and scientific sectors.
