Abstracts

The global 1,3-Propylene Sulfite market size is expected to reach \$ 34.41 million by 2032, rising at a market growth of 8.5% CAGR during the forecast period (2026-2032).

Propylene sulfite, under the main scope of this report, refers to 1,3-Propylene Sulfite or Trimethylene Sulfite, CAS 4176-55-0. It is a cyclic sulfite compound used mainly as a lithium-ion battery electrolyte additive, especially for interface modification, electrolyte stability improvement and low-temperature performance enhancement. It is also sold as a research chemical or fine-chemical intermediate. The 1,2-propyleneglycol sulfite isomer, CAS 1469-73-4, should be treated separately.

According to our research, propylene sulfite should be treated as a niche lithium-ion battery electrolyte additive rather than a mainstream electrolyte solvent or a large-volume additive. The most appropriate scope is 1,3-Propylene Sulfite / Trimethylene Sulfite, CAS 4176-55-0. It should not be mixed with 1,2-propyleneglycol sulfite, 1,3-propane sultone, ethylene sulfite, ethylene sulfate, VC, FEC or other electrolyte additives.

From the demand side, its main value lies in electrolyte formulation improvement, especially interface modification, low-temperature behavior, high-temperature stability and compatibility with PC-containing electrolyte systems. However, it is usually used as a low-percentage additive rather than a base solvent. Therefore, market sizing should be based on the standalone additive value, not the total electrolyte market or total lithium battery market.

From the supply side, the public producer evidence is relatively weaker than for mainstream additives such as VC, FEC and DTD. Fujian Chuangxin appears to be one

of the stronger China-based production leads. Shuangju Energy has a clear product page and battery-additive positioning, while Sinochem Nanjing has a product lead but needs further isomer verification. TCI, Sigma-Aldrich, J&K and Fisher Scientific should be classified mainly as research-grade, catalog or distribution channels rather than battery-grade bulk producers.

The key product barrier is not ordinary chemical availability, but battery-grade consistency. Customers care about purity, water content, acidity, color, metal ions, residual sulfur-containing impurities, packaging dryness, storage stability and batch-to-batch reproducibility. For electrolyte additive qualification, the material also needs to show stable SEI/CEI behavior, low gas generation, good cycling performance and compatibility with other additives such as VC, FEC, DTD, LiDFP or LiPO₂F₂.

Looking ahead, propylene sulfite is likely to remain a small but useful formulation additive. Its growth will depend on whether electrolyte manufacturers continue using it in specialized low-temperature, PC-compatible, high-voltage or high-temperature formulations. The market should be modeled as a small, China-skewed, formulation-driven electrolyte additive segment, with clear separation between battery-grade producers, high-purity suppliers, research catalog suppliers and distributors.

This report studies the global 1,3-Propylene Sulfite production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for 1,3-Propylene Sulfite and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of 1,3-Propylene Sulfite that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global 1,3-Propylene Sulfite total production and demand, 2021-2032, (Tons)

Global 1,3-Propylene Sulfite total production value, 2021-2032, (USD Million)

Global 1,3-Propylene Sulfite production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Tons), (based on production site)

Global 1,3-Propylene Sulfite consumption by region & country, CAGR, 2021-2032 & (Tons)

U.S. VS China: 1,3-Propylene Sulfite domestic production, consumption, key domestic manufacturers and share

Global 1,3-Propylene Sulfite production by manufacturer, production, price, value and

market share 2021-2026, (USD Million) & (Tons)

Global 1,3-Propylene Sulfite production by Product Grade, production, value, CAGR, 2021-2032, (USD Million) & (Tons)

Global 1,3-Propylene Sulfite production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Tons)

This report profiles key players in the global 1,3-Propylene Sulfite market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Fujian Chuangxin Science and Technology Development Co., Ltd., Zhangjiagang Free Trade Zone Shuangju Energy Technology Co., Ltd., Sinochem Nanjing Corporation, Tokyo Chemical Industry Co., Ltd., Merck KGaA, American Elements, J&K Scientific, Thermo Fisher Scientific, Dayang Chem (Hangzhou) Co., Ltd., Shanghai Macklin Biochemical Co., Ltd., etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World 1,3-Propylene Sulfite market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (Tons) and average price (US\$/Ton) by manufacturer, by Product Grade, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

Key Questions Answered:

1. How big is the global 1,3-Propylene Sulfite market?
2. What is the demand of the global 1,3-Propylene Sulfite market?
3. What is the year over year growth of the global 1,3-Propylene Sulfite market?

4. What is the production and production value of the global 1,3-Propylene Sulfite market?
5. Who are the key producers in the global 1,3-Propylene Sulfite market?
6. What are the growth factors driving the market demand?
