Abstracts

The global 1,4-Butanediol Vinyl Ether market size is expected to reach \$ 47.71 million by 2032, rising at a market growth of 5.5% CAGR during the forecast period (2026-2032).

Hydroxybutyl vinyl ether is a functional chemical monomer product with active vinyl and hydroxyl functional groups. Its upstream is supplied by fine chemical raw materials and vinyl raw materials, the midstream is undertaken by specialized monomer manufacturers, and the downstream is supplied by coating, adhesive and high-performance polymer manufacturing enterprises. In 2025, the global market average price was about US\$2,200/ton, the sales volume was about 14,500 tons, the global production capacity was about 15,800 tons/year, and the industry profit margin was about 10-18%.

The hydroxybutyl vinyl ether (HBVE) market will maintain stable growth, with an estimated CAGR of approximately 5.5%-5.8%, and the global market size will steadily expand to the 50 million USD level. The growth in demand from downstream coatings, adhesives, UV curing, electronic materials, the trend of environmentally friendly low VOC substitution, and technological innovation will all continue to drive market growth. At the same time, the global supply system is trending towards concentration on high-quality leading companies.
