Abstracts

According to our (Global Info Research) latest study, the global 2-axis Parallel Robots market size was valued at USD 198.8 million in 2022 and is forecast to a readjusted size of USD 238.1 million by 2029 with a CAGR of 2.6% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Parallel robots have three arms that are connected to a base platform via universal joints. Their arms are arranged as parallelograms to restrict the movement of the end platform. Actuators are located at the base platform, so that passive arms can be lightweight and move with great speed. Applications that require great precision and speed: common applications include packaging, high-precision assembly, and material handling.
