Abstracts

According to our (Global Info Research) latest study, the global 2-Dimentional Fiber Arrays market size was valued at US\$ 20.17 million in 2025 and is forecast to a readjusted size of US\$ 43.68 million by 2032 with a CAGR of 12.0% during review period.

In 2025, global 2 Dimensional Fiber Arrays production reached approximately 3542 K Units, with an average global market price of around 5.5 USD per Unit.

2 Dimensional Fiber Arrays are planar passive optical devices formed by precisely aligning multiple optical fibers in a row-and-column matrix configuration, followed by high-precision positioning, curing, end-face polishing, and packaging. The fibers are spatially distributed as a two-dimensional (XY) array with uniform and regular channel spacing, enabling parallel 2D spatial coupling of multiple optical signals, multi-channel splitting and combining, and large-area optical path interfacing. Compared to 1D Fiber Arrays, 2 Dimensional Fiber Arrays feature higher channel density and a larger scale of integration; they are characterized by high coupling precision, low insertion loss, excellent channel uniformity, and a compact spatial layout, making them ideally suited to meet the interfacing requirements of high-port-count optical devices, multi-channel optical waveguides, and 2D array optical chips.

The raw materials for 2 Dimensional Fiber Arrays mainly include optical fibers, V-groove substrates, adhesives, and other auxiliary materials. Typical raw material suppliers include Heraeus, Tosoh, Momentive, Shin-Etsu, SCHOTT, Kavalier, and others. Downstream applications are mainly in planar optical wave circuit (PLC) devices, optical transceiver modules, silicon photonics, CPO, and optical engine fields. Typical users

include NVIDIA, Broadcom, Huawei, ZTE, and others.

The single-line capacity of 2 Dimensional Fiber Arrays varies greatly depending on the technology route, degree of customization, and level of automation of the production line. The overall gross profit margin of the industry is in the range of 30%-45%.
