Abstracts

The global 2-(Dimethylamino)ethyl Methacrylate(DMAEMA) market size is expected to reach \$ 192 million by 2032, rising at a market growth of 5.0% CAGR during the forecast period (2026-2032).

2-(Dimethylamino)ethyl Methacrylate(DMAEMA) is a functional methacrylate monomer containing tertiary amine functional groups. The molecule has both a double bond structure that can participate in free radical polymerization and a dimethylamino side group that can undergo protonation reactions, introducing cationic and pH responsive properties into the polymer. It is widely used in the preparation of water-soluble polymers, cationic resins, and functional copolymers, and is applied in the fields of coatings, adhesives, water treatment, papermaking auxiliaries, and biomedical materials. In 2025, global 2-(Dimethylamino)ethyl Methacrylate(DMAEMA) production reached approximately 45,987 MT, with an average global market price of around US\$ 2,891 per MT.

DMAEMA is a medium-sized functional monomer, with market demand mainly coming from the fields of water treatment flocculants, papermaking chemicals, and coating adhesives. Driven by stricter environmental policies and increasing demand for industrial water treatment, it has maintained steady growth overall; At the same time, its application in intelligent responsive polymers, biomedical materials, and electronic chemicals is gradually expanding, bringing new demand space; The supply side is mainly dominated by chemical companies from China, Japan, Europe, and America. The industry competition is relatively scattered, but there are certain technical barriers for mid to high end products. In the future, the market will develop towards high purity, specialization, and functional composites.
