## Abstracts

Double Injection, sometimes known as 2 material 2 shot molding or 2K molding, is an innovative manufacturing process used to produce complicated molded parts from two different materials. Through a highly specialized and automated process we carefully control the injection of multiple materials, including two different kinds of resin, into a single, multi-chambered mold.

### SCOPE OF THE REPORT:

Double Injection advantages include: Lower unit cost, improved part integrity, multi-material efficiency, higher-quality plastic part fabrication, reduced handling and secondary assembly, reduces cost and waste associated with assembly defects and enhanced tactile and cosmetic product features.
