A 2D-3D video microscope is a microscope that combines traditional two-dimensional (2D) microscopy with three-dimensional (3D) stereoscopic vision technology. This microscope can capture and display three-dimensional images of objects, while also providing traditional two-dimensional images. Through special lenses and software, 2D-3D video microscopes can provide more intuitive and detailed information about the surface structure of objects, allowing observers to better understand the three-dimensional morphology of the sample.
