Abstracts

The global 2D CAD Software market size is expected to reach $ 12918 million by 2032, rising at a market growth of 3.3% CAGR during the forecast period (2026-2032).

2D CAD software (Two-Dimensional Computer-Aided Design software) refers to computer applications used to create, edit, and manage two-dimensional technical drawings and engineering graphics. These tools are primarily designed for producing flat designs such as architectural floor plans, mechanical part drawings, electrical schematics, and engineering layouts. 2D CAD software provides functions including precise dimensioning, layer management, symbol libraries, and graphical editing, enabling designers to produce accurate and standardized drawings efficiently. By improving design productivity and reducing manual drafting errors, 2D CAD software is widely used in fields such as architecture, mechanical engineering, electronics, manufacturing, and infrastructure planning, making it an essential tool in technical design and drafting.
