## Abstracts

The global 2K Computer Screen market size is expected to reach \$ 31442 million by 2032, rising at a market growth of 11.4% CAGR during the forecast period (2026-2032).

In 2025, global 2K Computer Screen production reached approximately 64.97 million units, with an average global market price of around US\$220 per unit.

A 2K computer screen is a high-resolution display with a resolution of 2560x1440 pixels, widely used in office work, design, gaming, and finance. Compared to 1080p full HD screens, 2K screens offer finer image details, higher color accuracy, and larger workspace, enhancing user experience in graphic processing, text editing, and multitasking. With the widespread adoption of laptops, desktops, and all-in-one PCs, 2K screens hold a significant position in the mid-to-high-end computing market.

The upstream of 2K computer screens mainly includes display panel manufacturers, backlight module suppliers, driver IC companies, and raw material providers such as glass substrates, polarizers, and liquid crystal materials. Representative upstream companies include BOE, CSOT, Samsung Display, and LG Display. The downstream applications are primarily in laptops, desktops, all-in-one PCs, and high-end monitors, with major brands like Lenovo, Dell, HP, and Apple. The full supply chain spans from raw material supply ? panel fabrication ? module assembly ? end-device integration.

The 2K computer screen market currently shows stable to slightly increasing trends. With continuous demand growth from laptops, gaming monitors, and professional workstations, 2K resolution remains attractive for mid-to-high-end devices. Upstream supply chain costs for glass substrates, liquid crystal materials, and driver ICs are stable, supporting manufacturer profitability. Market drivers include office automation

upgrades, esports and gaming industry growth, and increased remote education and content creation needs. However, challenges include the gradual penetration of high-end 4K/5K displays, pricing pressure from lower-end 1080p screens, and uncertainties in the global semiconductor and display supply chains. Overall, 2K screens remain mainstream in the mid-to-high-end market, with short-term price stability and strong competition.

This report studies the global 2K Computer Screen production, demand, key manufacturers, and key regions.
