## Abstracts

The global 2K Desktop Computer Display market size is expected to reach \$ 20212 million by 2032, rising at a market growth of 8.0% CAGR during the forecast period (2026-2032).

In 2025, global 2K Desktop Computer Display production reached approximately 45.74 million units, with an average global market price of around US\$250 per unit.

A 2K desktop computer screen is a high-resolution display with a resolution of 2560?1440 pixels, designed for desktop users and widely used in office work, multimedia entertainment, professional design, esports, and content creation. Compared to 1080p full HD screens, 2K displays offer higher pixel density, clearer image quality, richer color performance, and a larger workspace, making multitasking, graphic processing, and video editing smoother. With the growing demand from gaming and creative design, 2K desktop screens hold a key position in the mid-to-high-end market.

The upstream of 2K desktop screens mainly consists of LCD/LED panel manufacturers, backlight module suppliers, driver IC suppliers, and raw material providers such as glass substrates, polarizers, and liquid crystal materials. Representative companies include BOE, CSOT, Samsung Display, and LG Display. The downstream consists of desktop OEMs, gaming monitor brands, and professional monitor manufacturers, such as Dell, HP, Lenovo, ASUS, and Acer. The supply chain forms a complete ecosystem from raw materials ? panel fabrication ? module assembly ? end-device integration.

The 2K desktop screen market remains generally stable with slight growth, mainly in mid-to-high-end office, gaming, and professional design segments. With increasing

demand from remote work, esports, and content creation, 2K resolution has become a cost-effective choice with growing market penetration. Upstream panel and material supply are relatively stable, supporting cost control and profitability for manufacturers. Market drivers include office digitalization, growth in esports, and rising multimedia creation needs. However, the market faces competition from lower-end 1080p displays and high-end 4K/5K screens, while uncertainties in the global display supply chain may affect production and pricing. Overall, 2K desktop screens remain a mainstream choice in the mid-to-high-end market, with stable short-term pricing and intense competition.
