Abstracts

According to our (Global Info Research) latest study, the global 3-Mercapto-1,2-propanediol market size was valued at US\$ 3.49 million in 2025 and is forecast to a readjusted size of US\$ 4.74 million by 2032 with a CAGR of 4.5% during review period.

3-mercapto-1,2-propanediol is an organic compound belonging to the sulfur-containing diol class, with the chemical formula $C_3H_8O_2S$. It has a typical thiol functional group (-SH), which has certain activity in chemical reactions, especially in reactions with other substances, exhibiting certain reducibility and nucleophilicity. In 2025, global 3-Mercapto-1,2-propanediol production reached approximately 4.93 Tons, with an average global market price of around US\$ 687 per kg.

3-mercapto-1,2-propanediol is a special sulfur-containing intermediate with small batch, high unit price, and high purity requirements. The market size is not large, but the demand is relatively stable. Its core value does not lie in bulk consumption, but in the multifunctional reaction characteristics brought by thiol and dihydroxy structures, making it irreplaceable in fields such as fine chemicals, pharmaceutical research and development, biochemical experiments, material modification, polymer synthesis, and nanomaterials. The future market growth will mainly come from three directions: firstly, the sustained demand for thiol reducing reagents and functional intermediates in pharmaceutical and life science research; The second is the increasing demand for mercapto monomers and capping agents in the research of hydrogels, polymer networks, nanocrystals and functional materials; The third is the expansion of the application of personal care and fine chemical formulas to special sulfur-containing raw materials. Overall, this product will not form a significant large-scale expansion cycle,

but will maintain a development trend of high added value, customization, and high purification, possessing stable but niche attributes in the specialty chemical market.
